ABOUT ME

I am a passionate and detail-oriented Junior Web Developer with a BSc in Software Engineering from Daffodil International University. I specialize in front-end development using HTML, CSS, JavaScript, and modern frameworks like Tailwind CSS and DaisyUI. I enjoy building responsive, user-friendly websites and constantly seek to improve my coding skills through hands-on projects and learning.You can provide a description of yourself here...

WORK EXPERIENCE

junior web developer

City: Dhaka | **Country:** Bangladesh

Software Engineer

- Development and maintenance of web applications
- Collaborating with team members to design and implement new features
- Maintaining and troubleshooting computer systems and networks
- Communicating with clients and suppliers regarding project requirements

EDUCATION AND TRAINING

Bachelor of Science in Software Engineering

Daffodil International University https://daffodilvarsity.edu.bd/

City: DHAKA | **Country:** Bangladesh |

SKILLS

Git | HTML | JSON | Linux | CSS Framework (Bootstrap, Tailwind) | JavaScript | API Integration (REST API) | PHP | Python (Basic) | Laravel | CSS | MySQL | JSON Data Handling | Debugging Skills | React.js | SQL (Database Management) | C++ | C | oftware Requirement Analysis | MongoDB | Node.js | Python | Java | Postman | command line | Github | Microsoft Word | Google Drive | Microsoft Excel | Microsoft Office

PROJECTS

[10/10/2025 – 01/11/2025] **Online Quiz System**

Dynamic Data Fetching: Use an array of objects to store questions.

State Management: Tracking the current index, selected options, and score.

Timer System: A countdown per question to add a competitive feel.

Result Analysis: Showing the final score upon completion.

[05/12/2025 – 14/12/2025] **Ecommerce Project**

Dynamic Product Catalog with API integration (FakeStore API).

Global Cart State Management using Context API to handle items across pages.

Persistent storage using localStorage to keep the cart active after page refresh.

Responsive Grid UI built with Tailwind CSS.

Loading skeletons and error handling for improved user experience

[01/01/2026 – 10/01/2026] **online News Portal**

Real-time API Integration: Fetched live news articles from global sources using REST APIs (e.g., NewsAPI).

Dynamic Category Filtering: Implemented category-based navigation (Politics, Sports, Tech) to dynamically update the news feed.

Search & Optimization: Built a real-time keyword search functionality to filter news headlines instantly.

Dynamic Routing: Utilized React Router to create individual article detail views for a seamless reading experience.

[12/02/2026 – 20/02/2026] **Medicine Shop**

MediShop (Pharmacy Inventory System)

- **Tech Stack:** React.js, Tailwind CSS, LocalStorage, React Hooks.
- *Designed a pharmaceutical inventory platform featuring real-time stock monitoring, category-based filtering, and dynamic cart calculation with persistent data storage.*
